

UBIQUA

CORDLESS LIGHT, LIMITLESS LIFE

Our story

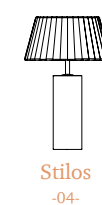

UBIQUA's mission: the company has always adhered to the concept of combining design and functionality in its products by continuously investing in new ideas and products. With our Italian style center, located in Verona and coordinated by the Italian designer Franco Pagliarini, we introduced a significant innovation in the world of lighting in 2017 through the invention of the first rechargeable cordless lamps with charging base. Thanks to this invention people can enjoy greater freedom of movement, being able to position lamps in strategic points without worrying about cables and sockets.

Therefore the integration of the technology of rechargeable batteries, LEDs and charging bases has made it possible to use this type of lamps without the need to constantly connect them to a power source. This not only simplified and made the use of the lamps safer, but also contributed to energy savings and reduced environmental impact. This innovation has had a positive impact on people's daily lives, improving lighting in different contexts, such as the home, outdoor spaces, public spaces, restaurants, hotels, bars and more. Our company has played a key role in bringing these solutions to the public's attention.

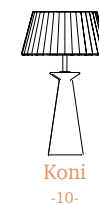

We have therefore brought together our series of rechargeable lamps into a dedicated brand called UBIQUA. The "UBIQUA" brand comes from the Latin word "ubique" meaning "everywhere", reflecting the brand's creative mission by redefining the concept of lighting. With our lamps, summarized in this new catalogue, we want to highlight the importance of design and technological innovation in improving people's quality of life and shaping the evolution of modern lighting.

With our lamps, summarized in this new catalogue, we want to highlight the importance of design and technological innovation in improving people's quality of life and shaping the evolution of modern lighting.
